Brussels Block

The irregular shape of Brussels Block® gives your installation a relaxed, timeless appearance. It's antiqued, tumbled look creates one-of-a-kind pavers which, when combined, achieve a natural "old world" cobblestone look.

Brussels Block® can be installed in either uniform patterns or random designs by combining paver shapes. An attractive, alternative use introduces grass, moss, or colored stone chips between pavers to heighten contrast and visual appeal.

colour selector

Welcome to Unilock's color selection and color combination page. Products availability and colors are regionalized, therefore you must first select a region before you can proceed. Then you will be able to scroll thru the various colors and compare them. You can compare two paver colors and a wall colors. You may wish to make "Paver 1" the border, "Paver 2" be the infill, and "Wall Color" be your selection for planters, steps, or a wall.
